Login to the site

Alternatively, for IIUM staff, the system integrate with Single Sign On (CAS). Kindly click Sign in with CAS button to login. Enter your credential using your email ID and password (HURIS)

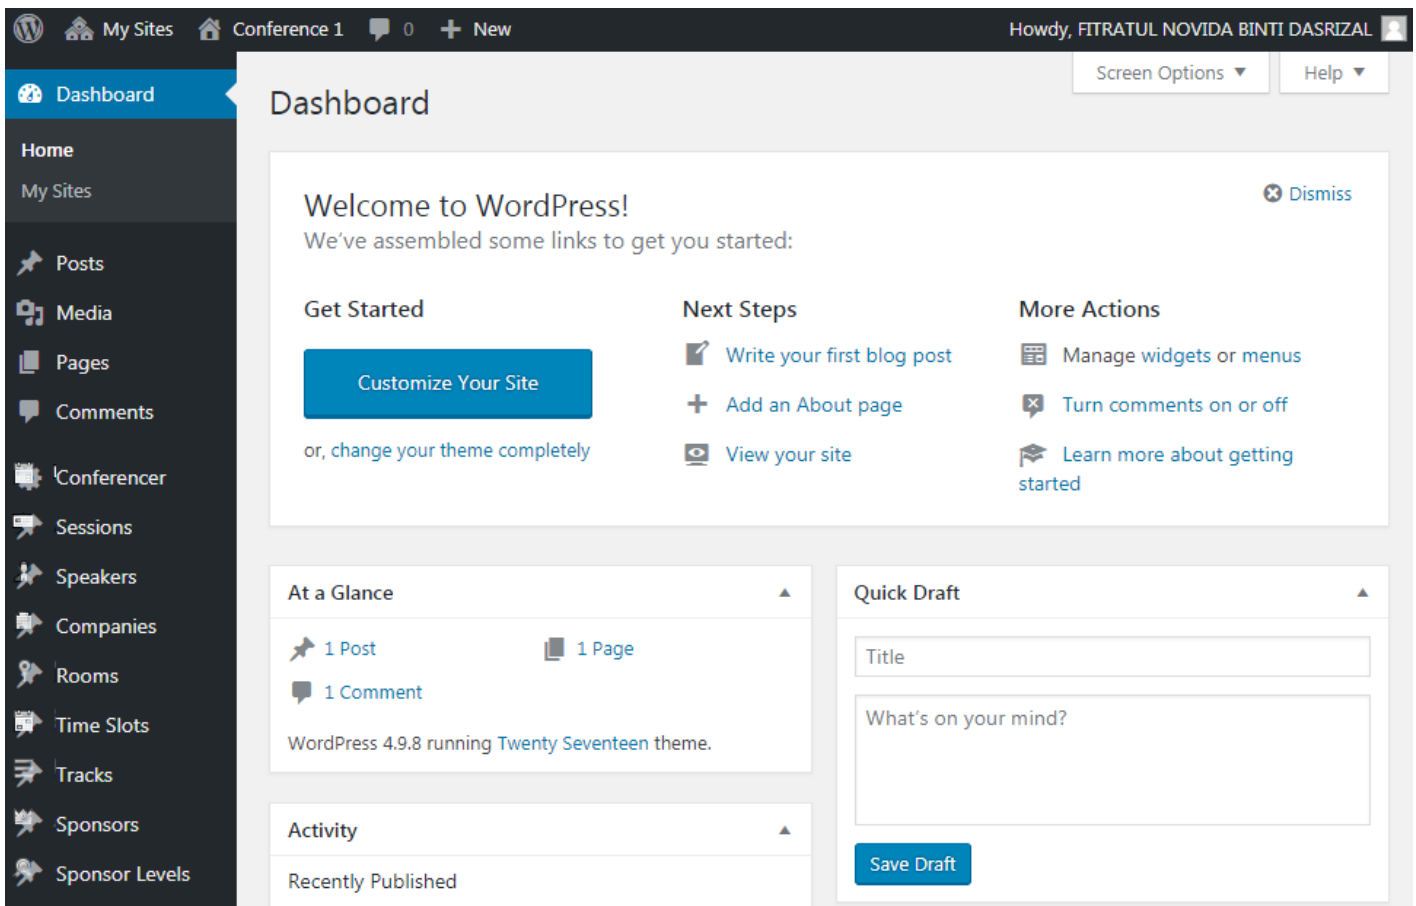

The diagram illustrates the login process for a WordPress site using CAS authentication. On the left, a WordPress login page features the WordPress logo at the top. Below it, a blue button with a lock icon and the text "Sign in with CAS" is highlighted with a purple border. Below this button is the text "— or —". Underneath, there are two input fields: "Username or Email Address" and "Password". A "Remember Me" checkbox is located below the password field, and a blue "Log In" button is at the bottom right. A purple arrow points from the "Sign in with CAS" button to the right-hand page.

The right-hand page is the CAS login interface for International Islamic University Malaysia. It features the university's logo and name in Arabic and English at the top. Below the header, there are two input fields: "Username:" and "Password:". A green "LOGIN" button is positioned below the password field. A security notice states: "For security reasons, please [log out](#) and exit your web browser when you are done accessing services that require authentication!". At the bottom, a footer contains the text: "Copyright © 2005–2017 Apereo, Inc. Powered by CAS 5.2.4".

For external users, kindly login with your username or email address and password to login. This is setup by the staff administrator for that site.

This image is a close-up of the WordPress login form. The "Sign in with CAS" button is at the top. Below it is the "— or —" separator. The "Username or Email Address" and "Password" input fields are highlighted with a purple border. The "Remember Me" checkbox and the "Log In" button are also visible at the bottom of the form.

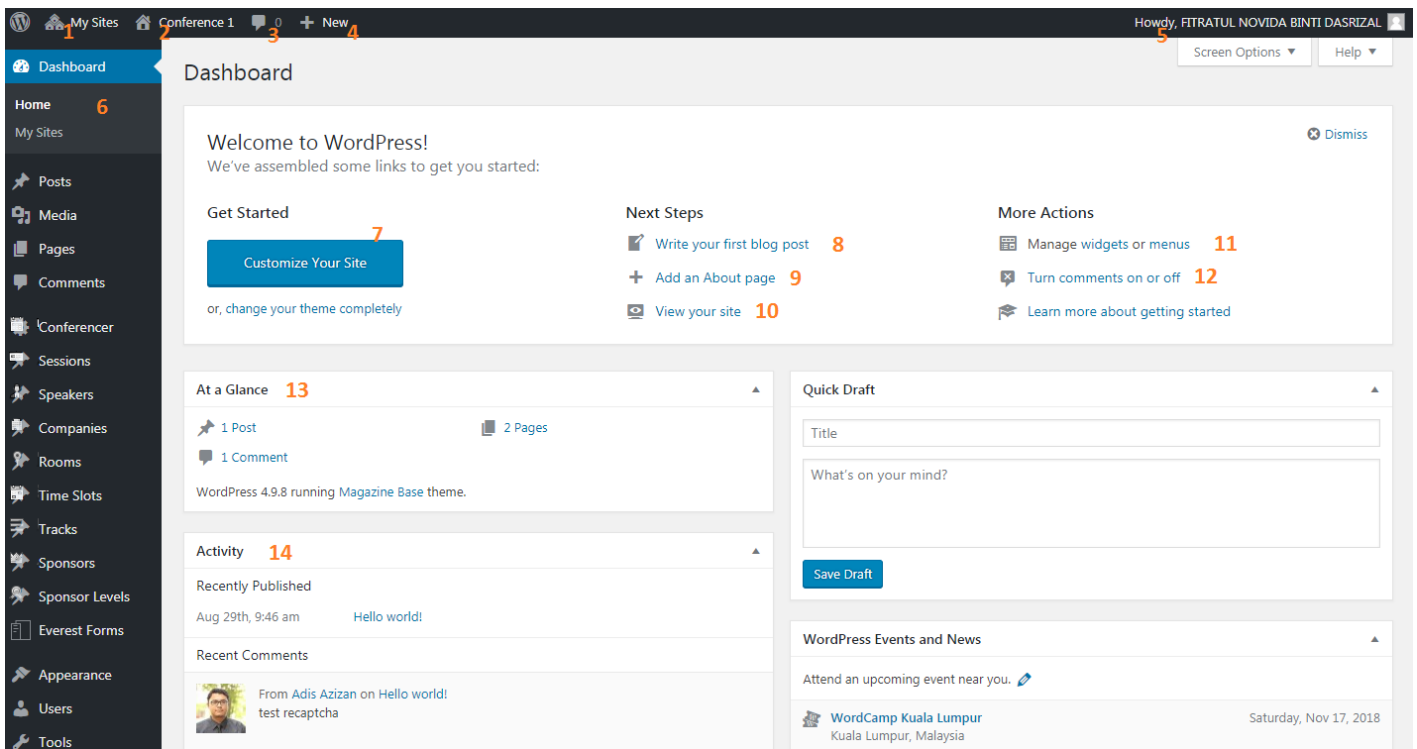

You may view the Dashboard page as below.

Dashboard

Figure below shows the dashboard of the site. All the setting can be done here.

1. View all sites that have been created and managed by user.
2. View user site
3. View comment
4. Create new page. Post or others
5. View user profile
6. Site Menu to manage user site
7. To customize your site for example changed theme
8. User may write their first blog post
9. User may add an About page
10. User may view their site
11. User may manage site widget or menus
12. User may turn the comments on or off
13. View total number of post, pages and comment that have been created
14. View the site activity
